Cumulative Contents of *Information Technology and Libraries*, 1982–1997

Compiled by James J. Kopp

As part of the commemoration of thirty years of publication of the journals of the Library and Information Technology Association and its precursor, the Information Science and Automation Division, an effort has been undertaken to bring together the cumulative contents of these publications. Presented here are the cumulative contents of *Information Technology and Libraries* from volume 1 (1982) through volume 17 (1997). The cumulative contents of the *Journal of Library Automation (JOLA)*, which was published from 1968 through 1981 (volumes 1 through 14), appear in the December 1998 (vol. 17, no. 4) issue of *ITAL*. The contents and abstracts (when available) are available on the LITA Web site (http://www.lita.org/ital/index.htm) and future contents and abstracts of the publication will appear there also. Included in the contents here (and online) are the contributed articles and communications in the publication. News of the association, general news items, and book reviews are not included.—*Ed.*

Volume 1 (1982)

Volume 1, Number 1
March 1982

"Guest Editorial: Old Wine in New Bottles?" (p.3–4), B. Kenney

"Entry of Local Data on OCLC: The Options and Their Impact on the Processing of Archival Tapes" (p.5–14), Dennis Reynolds

"The Future of the Book: A Historian's Perspective" (p.15–21), Edward M. Walters

"OCLC-MARC Tapes and Collection Management" (p.22–27), David U. Kim

"Network Service Centers and Their Expanding Role" (p.28–36), Joseph Ford

Communications:
"Online in Saudi Arabia" (p.37–41), Selden S. Deemer

"Retrospective Conversion at a Two-Year College" (p.41–44), Michael T. Krieger

"The USBC and Control of the Bibliographic Database" (p.44–48), F. H. Ayres, D. Ellis, J. A. W. Huggill, E. J. Yannakoudakis, and P. Goyal

"Use of Electronic Mail for ILL" (p.48–51), William DeJohn

"User Survey of a Microfiche Catalogue" (p.52–54), Peter Simmons and Jocelyn Foster

Reports and Working Papers:
"Correspondence on Telecommunications Act Revision" (p.55–63), Timothy E. Wirth and Eileen D. Cooke

"The CLASS Data Base Network" (p.63–68), CLASS Data Base Task Group

Volume 1, Number 2
June 1982

"Editorial: The Last Horse Soldiers" (p.83), Brian Aveney

"The CLR Public Online Catalog Study: An Overview" (p.84–97), Douglas Ferguson, Neal K. Kaske, Gary S. Lawrence, Joseph R. Matthews, and Robert Zich

"Telidon Graphics and Library Applications" (p.98–110), Andrej Tenne-Sens

"Status of Bibliographic Record System Elements" (p.111–24), C. Lee Jones

"Bibliographic Access & Control System" (p.125–32), Betsy Kelly, Cynthia Fedders, Audrey Powderly, and Deborah Yedlin

"Retrospective Conversion of Three Library Collections" (p.133–39), Carolyn A. Johnson

Communications:
"Dissemination of Scientific Information by Satellite" (p.140–42), Allan D. Pratt

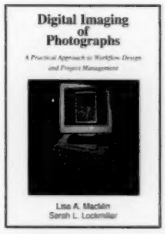
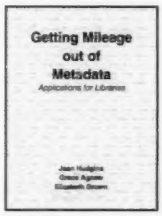
LITA Publications



Digital Imaging of Photographs: A Practical Approach to Workflow Design and Project Management

by Lisa Macklin and Sarah Lockmiller • 1999 • $20 ($18 LITA members) • ISBN 0838980058

A comprehensive approach to management of digital imaging in libraries and archives, from archival negatives to metadata cataloging and Web-based access. Practical guidelines and recommendations are provided for equipment, software, staffing, and workflow for every step of the digital imaging process. The authors share their considerable experience with and expertise in electronic materials, project workflow design, professional photography, and digital scanning.



Getting Mileage Out of Metadata: Applications for the Library

By Jean Hudgins, Grace Agnew, and Elizabeth Brown • 1999 • $22 ($19.20 LITA members) • ISBN 0838980066

An overview of the state-of-the-art metadata cataloging and currently available metadata standards, including comprehensive descriptions and links to current applications. Guides the reader through all steps in a successful metadata project, including planning, staffing, training, workflow, and evaluation. The authors draw on their own experience to give the reader a practical and thorough grounding in the design and management of metadata cataloging projects.
